WORK EXPERIENCE

Product Designer   TCS TATA CONSULTANCY SERVICES   — 2020 – 2023

- Tata Consultancy Services being one of leading IT, consulting and business solutions organizations, got an opportunity to work on multiple projects in different domains.
- As a End to End Product designer (**detailed UI design / UX / UI flows / wireframes & interactive prototypes**). Have knowledge in the iOS and Android platforms also the web interfaces. Experience working in dynamic, agile environments (Jira & Confluence). Proficiency with design systems, prototyping software and design tools such as Figma, Adobe Xd
- My core responsibilities are:
  - To take ownership of project with the team, from concept through to completion, understand the problem of product/service and target audience, create user journeys, wireframes, UI flows, interactive prototypes and usability research to iterate and refine designs.
  - Collaborate with design team members and other stakeholders ensure the design solutions are feasible and align with overall product vision.
- Have been worked on (**Metaverse - VR**) - Banking domain in creating a Virtual Reality Banking Environment incorporating **world space UI & 3D elements** within it which touts to be the next gen of banking domain.
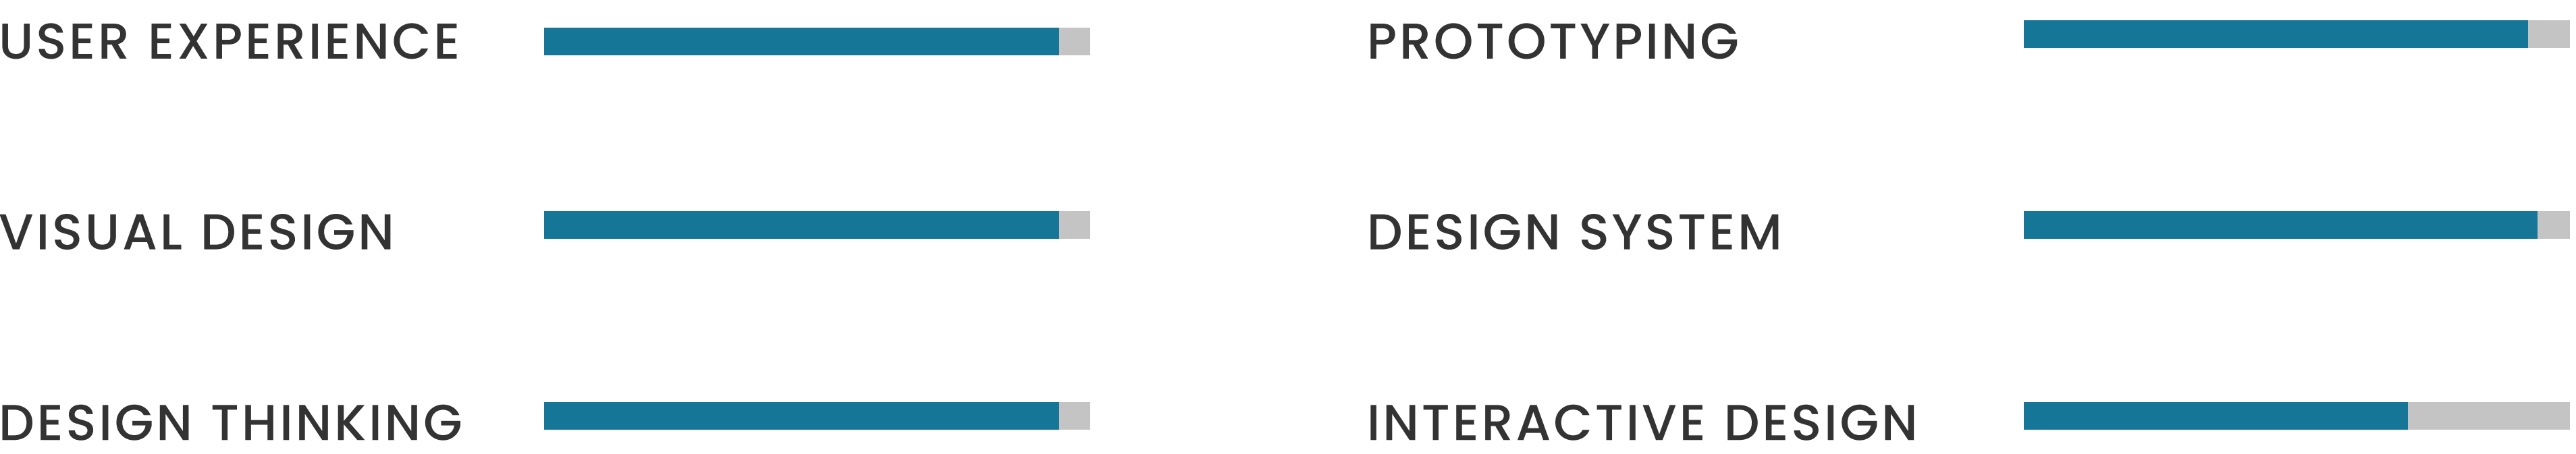

LLOYDS BANK   P&O Ferries   DHL   cargo-partner   AirAsia   ∞ Meta
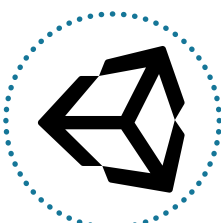

Graphic Designer   2adpro   — 2017 – 2019

- My journey began with 2adpro, a unique global design and technology services company. My major responsibilities had been creating visually rich graphic designs for advertisements, logos, posters, brochures, websites, social media graphics, etc.,
- Some of my other key responsibilities were collaborating with copywriters, photographers, and other professionals to create well-rounded designs.
